

# Legacy Platform Lifts

*Add safety, ease and luxury to your life.*

Finally, a code-certified, ADA compliant passenger lift for people who live in elevated houses! The Legacy Platform Lift transports you safely, quickly, and reliably from the ground level to your living area. You'll wonder how you ever lived without it!

Because the Legacy Platform Lift mounts on the exterior of your home, **installation is quick and affordable.** No new interior construction is needed and no valuable floor space inside your home is lost to an elevator shaft.

If you or a loved one (human or pet) have mobility issues, **this lift will improve everyone's quality of life dramatically!** No more worries about falling down or getting up the stairs. No more concerns about how to transport items from the house to the car and vice versa. Remain in your memory-filled home without having to deal with all the problems presented by stairs.

A Legacy Platform Lift adds ease and luxury to your life. **Imagine the time you will save being able to bring in all of your items from a day of shopping in just one trip!** Storm coming? With a Legacy Platform Lift, you can quickly move your belongings stored on ground level to safety. Plus, you will avoid the rain soaked, slippery steps if you must evacuate.
